Abl substrate peptide ISC-KS-160

| | |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Artikelname | Abl substrate peptide |
| Artikelnummer | ISC-KS-160 |
| Hersteller Artikelnummer | KS-160 |
| Alternativnummer | ISC-KS-160 |
| Hersteller | Isca Biochemicals |
| Kategorie | Biochemikalien |
| Produktbeschreibung | Abl substrate peptide is a synthetic peptide which can be used as a substrate for Abl kinase in kinase assays. Abl substrate peptide is phosphorylated by Abl kinase with a Km of 4 µM. Abl (Abelson) kinase is a plasma membrane associated non-receptor ... |
| Molekulargewicht | 1335.75 |
| NCBI | 1995 |
| Reinheit | >95% by HPLC |
| Formulierung | Freeze dried solid |
| Sequenz | EAIYAAPFAKKK |
| Formel | C64H10N15O16 |
| Target-Kategorie | Kinases |
| Anwendungsbeschreibung | ProductType: Substrate peptides |
