| Produktbeschreibung      | Bromodeoxyuridine (BrdU) is a thymidine analog which is selectively incorporated into the DNA of proliferating cells to provide a marker for the DNA being replicated. The number of proliferating cells can then be detected in cell lysates, tissue sect... |
| Puffer                   | Unstained mouse intestine sections, formalin-fixed, paraffin-embedded. Sections obtained from mice after treatment with BrdU.                                                                                                                                 |
| Anwendungsbeschreibung   | Optimal concentration should be evaluated by serial dilutions.                                                                                                                                                                                                |
