Chicken anti-native Green Fluorescent Protein, Clone: [Polyclonal], Gallus, Monoclonal NMB-BII-NGFPABC1-100

| | |
|--------------------------|---|
| Artikelname | Chicken anti-native Green Fluorescent Protein, Clone: [Polyclonal], Gallus, Monoclonal |
| Artikelnummer | NMB-BII-NGFPABC1-100 |
| Hersteller Artikelnummer | Bii-nGFPabC1-100 |
| Alternativnummer | NMB-BII-NGFPABC1-100 |
| Hersteller | NordicMubio |
| Wirt | Gallus |
| Kategorie | Antikörper |
| Applikation | ELISA, WB |
| Produktbeschreibung | Green fluorescent protein (GFP) is a 27kD protein which was originally identified in the photo organs of Aequorea victoria (A. victoria) jellyfish. GFP is a naturally fluorescent protein which emits green light at a maximum wavelength of 509 nm when ... |
| Klonalität | Monoclonal |
| Konzentration | 1mg/ml |
| Klon-Bezeichnung | [Polyclonal] |
| UniProt | P42212 |
| Puffer | Each vial contains 100µl 1 mg/ml polyclonal antiserum in 10 mM TRIS buffer pH 8.0, containing 0,15 mM NaCl and 0.02% sodium azide. |

| | |
|------------------------|--|
| Quelle | The anti-GFP antibody is a chicken polyclonal antiserum obtained from whole egg yolk of chickens immunised with highly purified native GFP derived from <i>Aequorea victoria</i> jellyfish. |
| Reinheit | Ammonium sulfate precipitation |
| Formel | Each vial contains 100µl 1 mg/ml polyclonal antiserum in 10 mM TRIS buffer pH 8.0, containing 0,15 mM NaCl and 0.02% sodium azide. The antibodies were purified by ammonium sulfate precipitation. |
| Anwendungsbeschreibung | Western Blotting ELISA |
