Product Datasheet

CML (N-Epsilon)-Carboxymethyl-Lysine, IgG2a, Clone: [NF-1G], Mouse, Monoclonal NMB-CML024

Artikelname	CML (N-Epsilon)-Carboxymethyl-Lysine, IgG2a, Clone: [NF-1G], Mouse, Monoclonal
Artikelnummer	NMB-CML024
Hersteller Artikelnummer	CML024
Alternativnummer	NMB-CML024
Hersteller	NordicMubio
Wirt	Mouse
Kategorie	Antikörper
Applikation	ELISA, IHC
Immunogen	N-Epsilon-(Carboxymethyl)-Lysine (CML)-HSA
Produktbeschreibung	This antibody is suitable for the detection of CML in tissues and tissue extracts. Long-term incubation of proteins with glucose leads, through Schiff's base and Amadori rearrangement products, to the formation of advanced glycation end products (AGE)...
Klonalität	Monoclonal
Konzentration	0.25 mg/ml
Klon-Bezeichnung	[NF-1G]
Isotyp	IgG2a

Puffer	Protein G affinity purified antibody from ascites in stabilized buffer, containing 50% Block Ace (Casein-containing solution, Dainippon Co.) and 0.1% ProClin (Rohm & Haas) as a preservative.
Reinheit	Protein G affinity purified antibody from ascites in stabilized buffer, containing 50% Block Ace? (Casein-containing solution, Dainippon Co.) and 0.1% ProClin? (Rohm & Haas) as a preservative
Anwendungsbeschreibung	IHC, ELISA
