Goat anti Mouse Disabled-1 (NT), Unconjugated NMB-U100P

Artikelname	Goat anti Mouse Disabled-1 (NT), Unconjugated
Artikelnummer	NMB-U100P
Hersteller Artikelnummer	U100P
Alternativnummer	NMB-U100P
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Applikation	WB
Spezies Reaktivität	Mouse
Konjugation	Unconjugated
Produktbeschreibung	Disruption of the disabled-1 gene (Dab1) results in aberrant migration of neurons during development and disorganization of laminar structures throughout the brain. Dab1 is thought to function as an adaptor molecule in signal transduction processes. ...
Konzentration	See vial for concentration
Isotyp	IgG
UniProt	P97318
Puffer	Provided as 0.2ml sterile filtered solution in phosphate buffered saline with 0.08% sodium azide.

Quelle	Goats were immunized with a recombinant protein corresponding to amino acids 1-179 of mouse disabled coupled to a GST fusion protein.
Reinheit	Ammonium Sulfate Precipitation
Formel	Provided as 0.2ml sterile filtered solution in phosphate buffered saline with 0.08% sodium azide.
Anwendungsbeschreibung	Immunoblotting at 1-5 $\mu\text{g/ml}$, Immunoprecipitation at 5-10 $\mu\text{g/ml}$. Optimal concentration should be evaluated by serial dilutions.
