Mouse anti Human Estrogen Receptor, IgG2a, Clone: [AER311], Unconjugated, Monoclonal NMB-X1266M

| | |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Artikelname | Mouse anti Human Estrogen Receptor, IgG2a, Clone: [AER311], Unconjugated, Monoclonal |
| Artikelnummer | NMB-X1266M |
| Hersteller Artikelnummer | X1266M |
| Alternativnummer | NMB-X1266M |
| Hersteller | NordicMubio |
| Wirt | Mouse |
| Kategorie | Antikörper |
| Applikation | EIA, ICC, IHC, IP, WB |
| Spezies Reaktivität | Human, Mouse |
| Konjugation | Unconjugated |
| Produktbeschreibung | The human estrogen receptor has a molecular weight of 67 kDa and consists of 6 functional domains (domains A-F). Functional mapping of the estrogen receptor has determined a transcriptional promoting activity in the A/B domain. The hormone-binding do... |
| Klonalität | Monoclonal |
| Konzentration | See vial for concentration |
| Klon-Bezeichnung | [AER311] |
| Isotyp | IgG2a |

| | |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| UniProt | P03372 |
| Puffer | Provided as solution in phosphate buffered saline with 0.08% sodium azide |
| Quelle | Hybridoma produced by the fusion of splenocytes from mice immunized with purified estrogen receptors from calf uterus and mouse myeloma cells. |
| Reinheit | Saturated ammonium sulphate precipitation. |
| Anwendungsbeschreibung | Antibody can be used for staining of human and mouse frozen and paraffin tissue sections. Optimal concentration should be evaluated by serial dilutions. Other Applications: Immunoprecipitation, Western Blotting, ELISA. |
