Product Datasheet

Rabbit anti Human cyclin dependent kinase 2, Unconjugated NMB-X1541P

Artikelname	Rabbit anti Human cyclin dependent kinase 2, Unconjugated
Artikelnummer	NMB-X1541P
Hersteller Artikelnummer	X1541P
Alternativnummer	NMB-X1541P
Hersteller	NordicMubio
Wirt	Rabbit
Kategorie	Antikörper
Applikation	IP, WB
Spezies Reaktivität	Human
Konjugation	Unconjugated
Produktbeschreibung	Cyclin-Dependent Kinase 2 (CDK2), also known as p33cdk2 is expressed earlier in the cell cycle than is p34cdc2. Like p34cdc2, p33cdk2 associates with cyclin A in human cells. However, kinase activity associated with cyclin A-cdc2 is found only in G2-...
Konzentration	See vial for concentration
Isotyp	IgG
UniProt	P24941
Puffer	This antibody recognizes only phosphorylated cdk2 protein.

Quelle	Rabbits were immunized with a synthetic peptide derived from the phosphorylated human cdk2 protein.
Reinheit	Ammonium Sulfate Precipitation
Formel	Provided as solution in phosphate buffered saline with 0.08% sodium azide
Anwendungsbeschreibung	Antibody can be used for Western blotting (1:2,000 dilution) and immunoprecipitation. Optimal concentration should be evaluated by serial dilutions.
