Product Datasheet

Goat anti Human alpha-2 haptoglobin, Clone: [Polyclonal], Monoclonal NMB-GAHU/HP

Artikelname	Goat anti Human alpha-2 haptoglobin, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-GAHU/HP
Hersteller Artikelnummer	GAHu/Hp
Alternativnummer	NMB-GAHU/HP
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Produktbeschreibung	The reactivity of the antiserum is restricted to haptoglobin. In immunoelectrophoresis and radial immunodiffusion (Ouchterlony), using various antiserum concentrations against fresh normal human plasma a single precipitin line is obtained which shows...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
UniProt	P00738
Puffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added. Reconstitute the lyophilized an

Quelle	Haptoglobin is an acute phase protein synthesized in the liver. In immunoelectrophoresis it has an alpha-2 mobility. It forms a group of heterogeneous proteins consisting of four peptide chains, two alpha and two beta chains. The molecular weight is about 80,000 daltons.
Formel	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. In immunoelectrophoresis use 2 µl or equivalent against 120 µl antiserum. In double radial immunodiffusion (Ouchterlony) use a rosette arrangement with 10 µl in a 3 mm diameter center well and 2 µl serum samples (neat and serially d
