Goat anti Human Factor XII, Clone: [Polyclonal], Monoclonal NMB-GAHU/FXII

Artikelname	Goat anti Human Factor XII, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-GAHU/FXII
Hersteller Artikelnummer	GAHu/FXII
Alternativnummer	NMB-GAHU/FXII
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Produktbeschreibung	The defined antibody reactivity is restricted to FXII, FXIIa and complexes of FXIIa with other proteins. In immunoelectrophoresis, bi-dimensional electrophoresis and radial immunodiffusion (Ouchterlony) against normal plasma, a single precipitin line...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
UniProt	P00748
Puffer	Delipidated, heat inactivated, lyophilized, stable whole serum. No preservative added. Total protein concentration in the antiserum is about 50 mg/ml, the IgG concentration about 10 mg/ml. No foreign proteins added. Reconstitute the lyophilized antiserum
Quelle	Factor XII (Hageman factor) is a single chain glycoprotein (MW 80,000). It is a serine protease zymogen. FXII is converted to an active enzyme by damage to vascular endothelium. In vitro activation is caused by glass or kaolin. Surface binding promotes a

Formel	Delipidated, heat inactivated, lyophilized, stable whole serum. No preservative added. Total protein concentration in the antiserum is about 50 mg/ml, the IgG concentration about 10 mg/ml. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. The antiserum concentration required in the gel is normally between 1 and 2%.
