## Product Datasheet

### **Goat anti Human IgG IgA IgM (Fc specific), conjugated with Horseradish peroxidase, Clone: [Polyclonal], HRP, Monoclonal NMB-GAHU/IG(FC)/PO**

|                          |   |
|--------------------------|---|
| Artikelname              | Goat anti Human IgG IgA IgM (Fc specific), conjugated with Horseradish peroxidase, Clone: [Polyclonal], HRP, Monoclonal   |
| Artikelnummer            | NMB-GAHU/IG(FC)/PO  |
| Hersteller Artikelnummer | GAHu/Ig(Fc)/PO  |
| Alternativnummer         | NMB-GAHU/IG(FC)/PO  |
| Hersteller               | NordicMubio   |
| Wirt                     | Goat  |
| Kategorie                | Antikörper  |
| Konjugation              | HRP   |
| Produktbeschreibung      | The reactivity of the antiserum is directed to the Fc subunits of the major isotypes of the human immunoglobulin system. No reaction is obtained with purified IgG/Fab or any non-Ig protein of human serum, as tested by immunoelectrophoresis and double... |
| Klonalität               | Monoclonal  |
| Klon-Bezeichnung         | [Polyclonal]  |
| Puffer                   | Peroxidase-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. It is reconstituted by adding 1 ml sterile distilled water.   |

|                        |   |
|------------------------|---|
| Quelle                 | Purified polyclonal human IgG, and IgA and IgM containing fractions isolated from human serum. Freund's complete adjuvant is used in the first step of the immunization procedure.              |
| Formel                 | Peroxidase-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. |
| Anwendungsbeschreibung | ELISA, Immunocytochemistry, Immunohistochemistry (paraffin), Dot blot, Immunoblotting.  |
