NM-LYSE: Flow Cytometry Lysing Solution (CE/IVD) NMB-GAS-003

Artikelname	NM-LYSE: Flow Cytometry Lysing Solution (CE/IVD)
Artikelnummer	NMB-GAS-003
Hersteller Artikelnummer	GAS-003
Alternativnummer	NMB-GAS-003
Hersteller	NordicMubio
Kategorie	Sonstiges
Applikation	FC
Produktbeschreibung	Flow cytometric analyses with monoclonal antibodies were so far restricted to leukocyte populations, which had been separated from erythrocytes before staining and/or analysis. Instead, whole blood staining methods allow for a rapid and accurate dete...
Puffer	NM-LYSE can be applied in wash- or no-wash lysing procedures with whole blood or bone marrow samples. NM-LYSE is a premixed, ready to use lysing solution fomulated for lysing erythrocytes following monoclonal antibody staining of whole blood. Treatment w
Anwendungsbeschreibung	Biological fluids (blood, bone marrow, and others) must be collected under sterile conditions. Anticoagulation with EDTA or heparin is recommended. The samples should be stored at room temperature until used. For optimal results, samples should be proces
