Product Datasheet

Rabbit anti Human beta thromboglobulin, Clone: [Polyclonal], Monoclonal NMB-RAHU/BTG

Artikelname	Rabbit anti Human beta thromboglobulin, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-RAHU/BTG
Hersteller Artikelnummer	RAHu/BTG
Alternativnummer	NMB-RAHU/BTG
Hersteller	NordicMubio
Wirt	Rabbit
Kategorie	Antikörper
Produktbeschreibung	The defined antibody specificity is restricted to beta-thromboglobulin as tested at the level of sensitivity of immunoprecipitation techniques. A single precipitin line is obtained in biddimensional electrophoresis against normal plasma and platelet ...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
UniProt	P02775
Puffer	Delipidated, heat inactivated lyophilized whole serum. Sodium azide 1 mg/ml. Total protein and IgG concentrations in the antiserum are comparable to those of normal pooled rabbit serum. No foreign proteins added.

Quelle	Beta-thromboglobulin is a platelet specific protein. In normal plasma mean concentrations of 30 ng/ml have been found. Highly purified beta-thromboglobulin has been isolated from platelets and is used for the immunization. Freund's complete adjuvant is used
Formel	Delipidated, heat inactivated lyophilized whole serum. Sodium azide 1 mg/ml. Total protein and IgG concentrations in the antiserum are comparable to those of normal pooled rabbit serum. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. In electroimmunodiffusion the amount of antiserum required in the agarose gel is usually about 2% depending on the test arrangement. The amount of beta-thromboglobulin precipitated by 1 ml antiserum is approximately 0.2 mg.
