## Product Datasheet

### Rabbit anti Human fibonectin, Clone: [Polyclonal], Monoclonal NMB-RAHU/FBN

Artikelname	Rabbit anti Human fibonectin, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-RAHU/FBN
Hersteller Artikelnummer	RAHu/Fbn
Alternativnummer	NMB-RAHU/FBN
Hersteller	NordicMubio
Wirt	Rabbit
Kategorie	Antikörper
Produktbeschreibung	The reactivity of the antiserum is restricted to fibronectin. In immunoelectrophoresis and radial immunodiffusion, using various antiserum concentrations against human plasma, sera and purified fibronectin a single precipitin line is obtained. Testin...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
UniProt	<a href="#">P02751</a>
Puffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum. Sodium azide 0.7 mg/ml Total protein and IgG concentrations in the antiserum are comparable to those of normal pooled rabbit serum. No foreign proteins added. It is reconstituted by addi
Quelle	Fibrinogen (clotting factor I) is a heat labile beta glycoprotein (molecular weight 340,000) and consists of three pairs of chains bound by disulphide bonds. It is synthesized in hepatocytes under genetic control. It is the precursor of fibrin, which is

Formel	Delipidated, heat inactivated, lyophilized, stable whole antiserum. Sodium azide 0.7 mg/ml Total protein and IgG concentrations in the antiserum are comparable to those of normal pooled rabbit serum. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. In immunoelectrophoresis use 2 µl amniotic fluid or equivalent against 120 µl antiserum. In double radial immunodiffusion use a rosette arrangement with 10 µl antiserum in 3 mm diameter center well and 2 µl amniotic fluid or hepatom
