## Product Datasheet

### **Rabbit anti Monkey IgG IgA IgM (heavy and light chains), conjugated with Biotin, Clone: [Polyclonal], Monoclonal NMB-RAMON/IG/BIO**

Artikelname	Rabbit anti Monkey IgG IgA IgM (heavy and light chains), conjugated with Biotin, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-RAMON/IG/BIO
Hersteller Artikelnummer	RAMon/Ig/Bio
Alternativnummer	NMB-RAMON/IG/BIO
Hersteller	NordicMubio
Wirt	Rabbit
Kategorie	Antikörper
Konjugation	Biotin
Produktbeschreibung	The defined antibody specificity is directed to the major isotypes of the monkey immunoglobulin system and to the surface determinants of the common Fab portion as tested against as tested in immunoelectrophoresis and double radial immunodiffusion (O...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
Puffer	Biotin-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. It is reconstituted by adding 1 ml sterile distilled water, spun d

Quelle	Highly purified IgG, IgA and IgM isolated from Rhesus monkey serum. Freund's complete adjuvant is used in the first step of the immunization procedure.
Formel	Biotin-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity.
Anwendungsbeschreibung	ELISA, Immunocytochemistry, Immunohistochemistry (paraffin), Dot blot, Immunoblotting.
