| Hersteller               | Enzo Life Sciences                                                                                                                                                                                                                                       |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                              |
| Applikation              | ELISA                                                                                                                                                                                                                                                    |
| Spezies Reaktivität      | All                                                                                                                                                                                                                                                      |
| Produktbeschreibung      | The 12(S)-HETE EIA kit is a colorimetric competitive enzyme immunoassay kit with results in 5 hours. Absorbance is read at 405 nm. Fast, accurate, and reliable results are obtained with ready-to-use liquid color-coded reagents that reduce error.... |
| Sensitivitaet            | 146 pg/ml (range 195 - 50,000 pg/ml)                                                                                                                                                                                                                     |
| Target-Kategorie         | 12(S)-HETE                                                                                                                                                                                                                                               |
| Anwendungsbeschreibung   | For the quantitative determination of 12(S)-HETE in culture supernatants and plasma from any species. Cited sample types include serum, renal interstitial fluid and tissue.                                                                             |
