Product Datasheet

Poly-L-Lysine coated glass slides. Adhesive to frozen and paraffin embedded tissue sections, cyto-centrifuge preparations and cytology smears. Used keep cells and or tissue from peeling off the slides during the experiment., Uncon
NBS-KBB-KTEHXR-50

Artikelname	Poly-L-Lysine coated glass slides. Adhesive to frozen and paraffin embedded tissue sections, cyto-centrifuge preparations and cytology smears. Used keep cells and or tissue from peeling off the slides during the experiment., Uncon
Artikelnummer	NBS-KBB-KTEHXR-50
Hersteller Artikelnummer	KBB-KTEHXR-50
Alternativnummer	NBS-KBB-KTEHXR-50
Hersteller	Nordic BioSite
Kategorie	Zellen/Zellkultur
Applikation	ELISA, ICC, IF, IHC, WB
Konjugation	Unconjugated
Produktbeschreibung	Poly-L-Lysine coated glass slides. Adhesive to frozen and paraffin embedded tissue sections, cyto-centrifuge preparations and cytology smears. Used keep cells and or tissue from peeling off the slides during the experiment....
