| Kategorie                | Antikörper                                                                                                                                                                                                                                     |
| Immunogen                | Recombinant Mouse Siglec-3/CD33 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Asp18-Glu240) of mouse Siglec3/CD33 (Accession NP_001104528.1) fused with a 6*His tag at the C-terminus. |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                   |
