| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, IF, WB                                                                                                                                                                                                                                                 |
| Immunogen                | Influenza hemagglutinin-HA-epitope: YPYDVPDYA, conjugated to KLH                                                                                                                                                                                              |
| Produktbeschreibung      | Influenza virus is a single-stranded RNA virus, segmented, 70nm diameter and enveloped. Strains are described by geographic origin, strain number, year of isolation and hemagglutination (H) and neuraminidase (N) antigens. Applications: Suitable for u... |
| Reinheit                 | Purified by immunoaffinity chromatography.                                                                                                                                                                                                                    |
| Formulierung             | Supplied as a liquid in PBS, pH 7.2, 0.09% sodium azide.                                                                                                                                                                                                      |
