## Product Datasheet

### Mouse IgG2a kappa Isotype Control [MOPC-173] (FITC), Monoclonal ABC-A86311-100

|                          |                                                                                                                     |
|--------------------------|---------------------------------------------------------------------------------------------------------------------|
| Artikelname              | Mouse IgG2a kappa Isotype Control [MOPC-173] (FITC), Monoclonal                                                     |
| Artikelnummer            | ABC-A86311-100                                                                                                      |
| Hersteller Artikelnummer | A86311-100                                                                                                          |
| Alternativnummer         | ABC-A86311-100                                                                                                      |
| Hersteller               | Antibodies.com                                                                                                      |
| Wirt                     | Mouse                                                                                                               |
| Kategorie                | Antikörper                                                                                                          |
| Applikation              | FC                                                                                                                  |
| Immunogen                | The transplantable plasmacytoma MOPC-173 was induced by intraperitoneal injection of mineral oils into BALB/c mice. |
| Konjugation              | FITC                                                                                                                |
| Produktbeschreibung      | Mouse IgG2a [MOPC-173] (FITC) - Isotype Control...                                                                  |
| Klonalität               | Monoclonal                                                                                                          |
| Konzentration            | 1 mg/ml                                                                                                             |
| Klon-Bezeichnung         | [MOPC-173]                                                                                                          |
| Isotyp                   | IgG2a                                                                                                               |
| Puffer                   | Supplied in Phosphate Buffered Saline, pH 7.4, with 15 mM Sodium Azide.                                             |
| Formulierung             | Liquid                                                                                                              |

|                        |                                                                                                                                                                                                                                                               |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target-Kategorie       | Mouse IgG2a                                                                                                                                                                                                                                                   |
| Antibody Type          | Primary Antibody                                                                                                                                                                                                                                              |
| Application Verdünnung | Negative control: The reagent is intended as an isotype control to establish the amount of non-specific antibody binding. For your particular experiment, use the same concentration of this control antibody as the recommended working concentration of the |
