Chemiluminescent Substrate Solution (AE Marker), Unconjugated ABS-ABK-001-2L

Artikelname	Chemiluminescent Substrate Solution (AE Marker), Unconjugated
Artikelnummer	ABS-ABK-001-2L
Hersteller Artikelnummer	ABK-001-2L
Alternativnummer	ABS-ABK-001-2L
Hersteller	AcroBiosystems
Kategorie	Sonstiges
Konjugation	Unconjugated
Produktbeschreibung	The chemiluminescence substrate solution is a simple triggering reagent for acridinium ester (AE) fast light emission. Acridinium ester is the most commonly used for protein labeling and widely used in automated instruments because of its high sensit...
Quelle	The chemiluminescence substrate solution is a simple triggering reagent for acridinium ester (AE) fast light emission. Acridinium ester is the most commonly used for protein labeling and widely used in automated instruments because of its high sensitivit
Formulierung	Solid
Anwendungsbeschreibung	The chemiluminescence substrate solution is used to trigger acridinium ester labels to give a quite rapid light emission in chemiluminescence technology.
