| Immunogen                | 201-300/418                                                                                                                                                                                                                                                  |
| Konjugation              | AbFluor 750                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | Beta-adrenergic receptors mediate the catecholamine-induced activation of adenylate cyclase through the action of G proteins. The beta-2-adrenergic receptor binds epinephrine with an approximately 3-fold greater affinity than it does norepinephrine.... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                   |
| Konzentration            | 1ug/ul                                                                                                                                                                                                                                                       |
| NCBI                     | <a href="#">154</a>                                                                                                                                                                                                                                          |

|                        |                                                                                                        |
