| Konjugation              | AbFluor 405                                                                                                                                                                                                                                                   |
| Produktbeschreibung      | Nuclear hormone receptor. Binds estrogens with an affinity similar to that of ESR1, and activates expression of reporter genes containing estrogen response elements (ERE) in an estrogen-dependent manner. Isoform beta-cx lacks ligand binding ability a... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1ug/ul                                                                                                                                                                                                                                                        |
| NCBI                     | <a href="#">2100</a>                                                                                                                                                                                                                                          |

|                        |                                                                                                        |
|------------------------|--------------------------------------------------------------------------------------------------------|
| Puffer                 | Aqueous buffered solution containing 0.01M TBS (pH7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol. |
| Quelle                 | KLH conjugated synthetic peptide derived from human ER-beta                                            |
| Reinheit               | Purified by Protein A.                                                                                 |
| Target-Kategorie       | Estrogen receptor beta                                                                                 |
| Application Verdünnung | WB(1:300-5000), FCM(1:20-100), IF(IHC-P)(1:50-200), IF(IHC-F)(1:50-200), IF(ICC)(1:50-200)             |
