| Immunogen                | 101-200/243                                                                                                                                                                                                                                                   |
| Konjugation              | AbFluor 750                                                                                                                                                                                                                                                   |
| Produktbeschreibung      | Ulex Europaeus is a European gorse shrub with fragrant golden-yellow flowers. Ulex Europaeus-I Lectin is a 46 kDa glycoprotein known to interact with -L fucosyl residues in oligosaccharides present on the membranes of human blood group O erythrocytes... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1ug/ul                                                                                                                                                                                                                                                        |

|                        |                                                                                                        |
|------------------------|--------------------------------------------------------------------------------------------------------|
| Puffer                 | Aqueous buffered solution containing 0.01M TBS (pH7.4) with 1% BSA, 0.03% Proclin300 and 50% Glycerol. |
| Quelle                 | KLH conjugated synthetic peptide derived from Ulex europaeus (Furze) Anti-H(O) lectin 1                |
| Reinheit               | Purified by Protein A.                                                                                 |
| Target-Kategorie       | Ulex Europaeus Lectin 1                                                                                |
| Application Verdünnung | WB(1:300-5000), IF(IHC-P)(1:50-200), IF(IHC-F)(1:50-200), IF(ICC)(1:50-200)                            |
