| Spezies Reaktivität      | Guinea pig, Human, Mouse, Porcine                                                                                                                                                                                                                             |
| Immunogen                | The immunogen is a synthetic peptide directed towards the N terminal region of human OPRK1                                                                                                                                                                    |
| Produktbeschreibung      | OPRK1 is a multi-pass membrane protein. It belongs to the G-protein coupled receptor 1 family. OPRK1 inhibits neurotransmitter release by reducing calcium ion currents and increasing potassium ion conductance. It is the receptor for dynorphins. OPRK1... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.5 mg/ml                                                                                                                                                                                                                                                     |
| Molekulargewicht         | 43kDa                                                                                                                                                                                                                                                         |

|              |                                                                                                   |
