| Kategorie                | Biochemikalien                                                                                                                                                                                                                                                |
| Produktbeschreibung      | 3CL protease, a viral cysteine proteinase, plays an important role in co-translational proteolytic processing of Coronavirus polyproteins. The 3CL protease cleaves as much as 11 sites in the replicase polyproteins and also releases the key replicativ... |
| Molekulargewicht         | 33.8 kDa (predicted) same as Tris-Bis PAGE result.                                                                                                                                                                                                            |
