## Product Datasheet

### Goat anti-RELMbeta EVE-EB08633

|                          |                             |
|--------------------------|-----------------------------|
| Artikelname              | Goat anti-RELMbeta          |
| Artikelnummer            | EVE-EB08633                 |
| Hersteller Artikelnummer | EB08633                     |
| Alternativnummer         | EVE-EB08633                 |
| Hersteller               | Everest                     |
| Wirt                     | Goat                        |
| Kategorie                | Antikörper                  |
| Applikation              | ELISA, IHC                  |
| Spezies Reaktivität      | Human                       |
| Immunogen                | C-DSVMDKKIKDVLNS            |
| Klonalität               | Polyclonal                  |
| Molekulargewicht         | 11,7                        |
| NCBI                     | <a href="#">84666</a>       |
| Reinheit                 | Antigen affinity purified   |
| Sequenz                  | DSVMDKKIKDVLNS              |
| Target-Kategorie         | Goat anti-RELMbeta Antibody |

|                        |                                                                                                                                                                                                                                                              |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | Peptide ELISA: antibody detection limit dilution 1:128000. Western Blot: Preliminary experiments gave an approx 35kDa band in Human Ileum and Duodenum lysates after 0.1µg/ml antibody staining. Please note that currently we cannot find an explanation in |
