| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, WB                                                                                                                                                                                                                                                     |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Purified human IgM.                                                                                                                                                                                                                                           |
| Konjugation              | HRP                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | Immunoglobulin M (IgM) is produced as a 900 kDa pentamer, which is an efficient complement binder. This antibody type is produced initially in the immune response and it is the first immunoglobulin class to be synthesized by a fetus or newborn. IgM a... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/ml                                                                                                                                                                                                                                                       |
| Klon-Bezeichnung         | [CH2]                                                                                                                                                                                                                                                         |
| Isotyp                   | Mouse IgG1                                                                                                                                                                                                                                                    |

|                        |                                                                                                                                             |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| Puffer                 | Stabilizing phosphate buffered saline (PBS), pH 7.4, 0.01% thimerosal                                                                       |
| Lagerung               | 2°C to 8°C                                                                                                                                  |
| Target-Kategorie       | IgM                                                                                                                                         |
| Antibody Type          | Monoclonal Antibody                                                                                                                         |
| Anwendungsbeschreibung | Western blotting: Recommended dilution: 1 µg/ml. Flow cytometry: Recommended dilution: 1-4 µg/ml, extracellular and intracellular staining. |
