ISRE LEEPOTER(TM) LUCIFERASE REPORTER-HEK293 CELL LINE ABI-14-143ACL

| | |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Artikelname | ISRE LEEPOTER(TM) LUCIFERASE REPORTER-HEK293 CELL LINE |
| Artikelnummer | ABI-14-143ACL |
| Hersteller Artikelnummer | 14-143ACL |
| Alternativnummer | ABI-14-143ACL-1VIAL |
| Hersteller | Abeomics |
| Kategorie | Zellen/Zellkultur |
| Applikation | FA |
| Produktbeschreibung | The ISRE LEEPOTER(TM) LUCIFERASE REPORTER cell line is a stably transfected HEK293 cell line which expresses Renilla luciferase reporter gene under the transcriptional control of the Interferon-Stimulated Response Element (ISRE). Activation of the r... |
| Application Verdünnung | Application: Monitor the JAK/STAT signaling pathway activity. IRF, STING signaling pathway study. Screen for activators or inhibitors of IRF, STING. Culture conditions: Cells should be grown at 37C with 5% CO2 using DMEM medium (w/ L-Glutamine, 4.5g/L G |
