| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | Actin-like protein 6A, or BAF Complex 53 KDa Subunit (BAF53a) is encoded by the gene ACTL6A and is a member of actin-related proteins family. It is a subunit of the neuron specific chromatin remodeling complex (nBAF complex). BAF53a is thought to be ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |

|                  |                                                                 |
|------------------|-----------------------------------------------------------------|
| Konzentration    | 1 mg/mL                                                         |
| Klon-Bezeichnung | [N336B/83]                                                      |
| Molekulargewicht | 53 kDa                                                          |
| Isotyp           | IgG2b                                                           |
| UniProt          | <a href="#">O96019</a>                                          |
| Puffer           | 10 mM Tris, 50 mM Sodium Chloride, 0.065% Sodium Azide pH 7.125 |
| Reinheit         | Purified by Protein A chromatography                            |
| Formulierung     | Liquid                                                          |
| Target-Kategorie | BAF53a                                                          |
| Antibody Type    | Primary Antibody                                                |
