| Category                   | Zellen/Zellkultur                                                                                                                                                                                                                                             |
| Application                | WB                                                                                                                                                                                                                                                            |
| Species Reactivity         | Mouse                                                                                                                                                                                                                                                         |
| Product Description        | BaF3 cell line was immortalized murine bone marrow-derived pro-B-cell line. BaF3 cells are depends IL3 for growth and proliferation. When cultured in the presence of IL3, or other growth-promoting factors, BaF3 cells are highly resistant to X-irradia... |
| Concentration              | 2 mg/ml                                                                                                                                                                                                                                                       |
| Buffer                     | Liquid. In SDS-PAGE Sample Buffer (0.12M Tris-HCl pH6.8, 0.4% SDS, 5% Glycerol, 1% beta-mercaptoethanol, 0.02% Bromophenol blue)                                                                                                                              |
| Application Notes          | Heat lysate to 95C for 5 minutes and rapidly cooling before use.                                                                                                                                                                                              |
