Goat anti Human high molecular weight kininogen (light chain specific), Clone: [Polyclonal], Monoclonal NMB-GAHU/HMWK

Article Name	Goat anti Human high molecular weight kininogen (light chain specific), Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-GAHU/HMWK
Supplier Catalog Number	GAHu/HMWK
Alternative Catalog Number	NMB-GAHU/HMWK
Manufacturer	NordicMubio
Host	Goat
Category	Antikörper
Product Description	The defined antibody specificity is to human high molecular weight kininogen. In immunoelectrophoresis, bi-dimensional electrophoresis and radial immunodiffusion (Ouchterlony, Mancini), using various antiserum concentrations against normal plasma, on...
Clonality	Monoclonal
Clone Designation	[Polyclonal]
Buffer	Delipidated, heat inactivated, lyophilized, stable whole serum. No preservative added. Total protein and IgG concentration in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added. Reconstitute the lyophilized antis
Source	Highly purified molecular weight kininogen isolated from pooled plasma. Freund's complete adjuvant is used in the first step of the immunization procedure.

Formula	Delipidated, heat inactivated, lyophilized, stable whole serum. No preservative added. Total protein and IgG concentration in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Application Notes	Precipitation assays. In electroimmunodiffusion (Laurell) the amount of antiserum required in the agarose gel is usually between 1 and 2%, depending on the test arrangement.
