### Goat anti Monkey C3c, conjugated with FITC, Clone: [Polyclonal], Monoclonal NMB-GAMON/C3C/FITC

|                            |  |
|----------------------------|--|
| Article Name               | Goat anti Monkey C3c, conjugated with FITC, Clone: [Polyclonal],<br>Monoclonal   |
| Biozol Catalog Number      | NMB-GAMON/C3C/FITC   |
| Supplier Catalog Number    | GAMon/C3c/FITC   |
| Alternative Catalog Number | NMB-GAMON/C3C/FITC   |
| Manufacturer               | NordicMubio  |
| Host                       | Goat   |
| Category                   | Antikörper   |
| Conjugation                | FITC   |
| Product Description        | In immunoelectrophoresis against fresh monkey serum, a single precipitin line is obtained in the beta-1 region representing native C3. Against serum containing partly activated C3, a precipitin line is obtained which extends from the beta-1 into the ...  |
| Clonality                  | Monoclonal   |
| Clone Designation          | [Polyclonal]   |
| Buffer                     | Fluorochrome-coupled purified hyperimmune IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2) No preservative added, as it may interfere with the antibody activity. It is reconstituted by adding 1 ml sterile distilled water, spun d |

|                   |  |
|-------------------|--|
| Source            | C3c is the major fragment resulting from C3 cleavage by C3 convertase and factor I. It is composed of an intact beta chain bound to two fragments of the alpha chain. C3c is isolated and purified from pooled normal monkey serum. Freund's complete adjuvant |
| Formula           | Fluorochrome-coupled purified hyperimmune IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2) No preservative added, as it may interfere with the antibody activity.  |
| Application Notes | ELISA, Immunocytochemistry, Immunohistochemistry (frozen), (In)direct immunofluorescence.  |
