Goat anti Rat IgG1 IgG2a IgG2b IgG2c (Fc specific), Clone: [Polyclonal], Monoclonal NMB-GARA/IGG(FC)

Article Name	Goat anti Rat IgG1 IgG2a IgG2b IgG2c (Fc specific), Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-GARA/IGG(FC)
Supplier Catalog Number	GARa/IgG(Fc)
Alternative Catalog Number	NMB-GARA/IGG(FC)
Manufacturer	NordicMubio
Host	Goat
Category	Antikörper
Product Description	The reactivity of the antiserum is directed to the Fc subunit of the IgG molecule including all subclasses. In immunoelectrophoresis and double radial immunodiffusion, using various antiserum concentrations against normal rat plasma and serum, a char...
Clonality	Monoclonal
Clone Designation	[Polyclonal]
Buffer	Delipidated, heat inactivated lyophilized stable whole serum No preservative added, as it may interfere with the antibody activity. Total protein and IgG concentration in the antiserum are comparable to those of pooled goat serum. No foreign proteins add
Source	Purified normal IgG, including all known subclasses, isolated from pooled rat serum. Freund's complete adjuvant is used in the first step of the immunization procedure.

Formula	Delipidated, heat inactivated lyophilized stable whole serum No preservative added, as it may interfere with the antibody activity. Total protein and IgG concentration in the antiserum are comparable to those of pooled goat serum. No foreign proteins add
Application Notes	Precipitation assays. In immunoelectrophoresis use 2 µl or equivalent against 120 µl antiserum. In double radial immunodiffusion (Ouchterlony) use a rosette arrangement with 10 µl antiserum in a 3 mm diameter centre well and 2 µl serum samples (neat and
