Rabbit anti Human J chain of dimeric IgA, conjugated with FITC, Clone: [Polyclonal], Monoclonal NMB-RAHU/J/FITC

Article Name	Rabbit anti Human J chain of dimeric IgA, conjugated with FITC, Clone: [Polyclonal], Monoclonal
Biozol Catalog Number	NMB-RAHU/J/FITC
Supplier Catalog Number	RAHu/J/FITC
Alternative Catalog Number	NMB-RAHU/J/FITC
Manufacturer	NordicMubio
Host	Rabbit
Category	Antikörper
Conjugation	FITC
Product Description	In immunoelectrophoresis and radial immunodiffusion (Ouchterlony), this immunoconjugate shows a single precipitation reaction with totally reduced and alkylated polyclonal and monoclonal polymeric IgA, secretory IgA and IgM. A reaction of complete id...
Clonality	Monoclonal
Clone Designation	[Polyclonal]
Buffer	FITC-coupled purified hyperimmune rabbit IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity.

Source	Human J chain is a polypeptide folded within the structure of the polymeric immunoglobulin, resulting in a very limited exposure of J chain antigenic determinants. The antiserum is raised against the isolated and purified J chain. J chains isolated from
Formula	FITC-coupled purified hyperimmune rabbit IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity.
Application Notes	ELISA, Immunocytochemistry, Immunohistochemistry (frozen), (In)direct immunofluorescence. The lyophilized conjugate is shipped at ambient temperature and may be stored at +4C, prolonged storage at or below -20C. It is reconstituted by adding 1 ml sterile
