FAT1 Antibody, Clone: [FAT1-3D7/1], Mouse, Monoclonal NSJ-V7767SAF-100UG

Article Name FAT1 Antibody, Clone: [FAT1-3D7/1], Mouse, Monoclonal Biozol Catalog Number NSJ-V7767SAF-100UG Supplier Catalog Number V7767SAF-100UG Alternative Catalog Number NSJ-V7767SAF-100UG Manufacturer NSJ Bioreagents Host Mouse Category Antikörper Application ELISA, IF, WB Species Reactivity Drosophila Immunogen The cytoplasmic domain of Drosophila Fat protein was used as the immunogen for the FAT1 antibody. The FAT proteins are members of the Cadherin superfamily homologous to the Drosophila Fat protein that functions as a positive regulator of planar cell polarity in the Drosophila wing. FAT1 is an unusual cadherin that controls cell growth and planar Clonality Monoclonal Concentration 1 mg/ml in 1X PBS, BSA free, sodium azide free Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa		
Supplier Catalog Number V7767SAF-100UG Alternative Catalog Number NSJ-V7767SAF-100UG Manufacturer NSJ Bioreagents Host Mouse Category Antikörper Application ELISA, IF, WB Species Reactivity Drosophila Immunogen The cytoplasmic domain of Drosophila Fat protein was used as the immunogen for the FAT1 antibody. Product Description The FAT proteins are members of the Cadherin superfamily homologous to the Drosophila Fat protein that functions as a positive regulator of planar cell polarity in the Drosophila wing. FAT1 is an unusual cadherin that controls cell growth and planar Clonality Monoclonal Concentration 1 mg/ml in 1X PBS, BSA free, sodium azide free Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa	Article Name	FAT1 Antibody, Clone: [FAT1-3D7/1], Mouse, Monoclonal
Alternative Catalog Number Manufacturer NSJ Bioreagents Host Mouse Category Antikörper Application ELISA, IF, WB Species Reactivity Drosophila The cytoplasmic domain of Drosophila Fat protein was used as the immunogen for the FAT1 antibody. The FAT proteins are members of the Cadherin superfamily homologous to the Drosophila Fat protein that functions as a positive regulator of planar cell polarity in the Drosophila wing. FAT1 is an unusual cadherin that controls cell growth and planar Clonality Monoclonal Concentration 1 mg/ml in 1X PBS, BSA free, sodium azide free Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa	Biozol Catalog Number	NSJ-V7767SAF-100UG
Manufacturer NSJ Bioreagents Mouse Category Antikörper Application ELISA, IF, WB Species Reactivity Drosophila The cytoplasmic domain of Drosophila Fat protein was used as the immunogen for the FAT1 antibody. The FAT proteins are members of the Cadherin superfamily homologous to the Drosophila Fat protein that functions as a positive regulator of planar cell polarity in the Drosophila wing. FAT1 is an unusual cadherin that controls cell growth and planar Clonality Monoclonal Concentration 1 mg/ml in 1X PBS, BSA free, sodium azide free Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa	Supplier Catalog Number	V7767SAF-100UG
Host Mouse Category Antikörper Application ELISA, IF, WB Species Reactivity Drosophila Immunogen The cytoplasmic domain of Drosophila Fat protein was used as the immunogen for the FAT1 antibody. The FAT proteins are members of the Cadherin superfamily homologous to the Drosophila Fat protein that functions as a positive regulator of planar cell polarity in the Drosophila wing. FAT1 is an unusual cadherin that controls cell growth and planar Clonality Monoclonal Concentration 1 mg/ml in 1X PBS, BSA free, sodium azide free Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa	Alternative Catalog Number	NSJ-V7767SAF-100UG
Category Antikörper Application ELISA, IF, WB Species Reactivity Drosophila Immunogen The cytoplasmic domain of Drosophila Fat protein was used as the immunogen for the FAT1 antibody. The FAT proteins are members of the Cadherin superfamily homologous to the Drosophila Fat protein that functions as a positive regulator of planar cell polarity in the Drosophila wing. FAT1 is an unusual cadherin that controls cell growth and planar Clonality Monoclonal Concentration 1 mg/ml in 1X PBS, BSA free, sodium azide free Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa	Manufacturer	NSJ Bioreagents
Application ELISA, IF, WB Species Reactivity Drosophila Immunogen The cytoplasmic domain of Drosophila Fat protein was used as the immunogen for the FAT1 antibody. The FAT proteins are members of the Cadherin superfamily homologous to the Drosophila Fat protein that functions as a positive regulator of planar cell polarity in the Drosophila wing. FAT1 is an unusual cadherin that controls cell growth and planar Clonality Monoclonal Concentration 1 mg/ml in 1X PBS, BSA free, sodium azide free Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa	Host	Mouse
Species Reactivity Drosophila The cytoplasmic domain of Drosophila Fat protein was used as the immunogen for the FAT1 antibody. The FAT proteins are members of the Cadherin superfamily homologous to the Drosophila Fat protein that functions as a positive regulator of planar cell polarity in the Drosophila wing. FAT1 is an unusual cadherin that controls cell growth and planar Clonality Monoclonal Concentration 1 mg/ml in 1X PBS, BSA free, sodium azide free Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa	Category	Antikörper
Immunogen The cytoplasmic domain of Drosophila Fat protein was used as the immunogen for the FAT1 antibody. The FAT proteins are members of the Cadherin superfamily homologous to the Drosophila Fat protein that functions as a positive regulator of planar cell polarity in the Drosophila wing. FAT1 is an unusual cadherin that controls cell growth and planar Clonality Monoclonal Concentration 1 mg/ml in 1X PBS, BSA free, sodium azide free Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa	Application	ELISA, IF, WB
Immunogen immunogen for the FAT1 antibody. The FAT proteins are members of the Cadherin superfamily homologous to the Drosophila Fat protein that functions as a positive regulator of planar cell polarity in the Drosophila wing. FAT1 is an unusual cadherin that controls cell growth and planar Clonality Monoclonal Concentration 1 mg/ml in 1X PBS, BSA free, sodium azide free Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa	Species Reactivity	Drosophila
Product Description homologous to the Drosophila Fat protein that functions as a positive regulator of planar cell polarity in the Drosophila wing. FAT1 is an unusual cadherin that controls cell growth and planar Clonality Monoclonal Concentration 1 mg/ml in 1X PBS, BSA free, sodium azide free Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa	Immunogen	i i
Concentration 1 mg/ml in 1X PBS, BSA free, sodium azide free Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa	Product Description	homologous to the Drosophila Fat protein that functions as a positive regulator of planar cell polarity in the Drosophila wing. FAT1 is an
Clone Designation [FAT1-3D7/1] Isotype Mouse IgM, kappa	Clonality	Monoclonal
Isotype Mouse IgM, kappa	Concentration	1 mg/ml in 1X PBS, BSA free, sodium azide free
	Clone Designation	[FAT1-3D7/1]
UniProt 014517	Isotype	Mouse IgM, kappa
OTHE IOU Q14517	UniProt	Q14517

Buffer	1 mg/ml in 1X PBS, BSA free, sodium azide free
Purity	PEG precipitation
Form	1 mg/ml in 1X PBS, BSA free, sodium azide free
Target	FAT1
Antibody Type	Primary Antibody
Application Dilute	ELISA (order BSA-free format for coating), Western blot: 1-2ug/ml, Immunofluorescence: 1-2ug/ml
Application Notes	Optimal dilution of the antibody should be determined by the researcher.
