| Category                   | Biochemikalien                                                                                                                                                                                                                                                                                                                 |
| Product Description        | Prochlorazium N3-Methyl Iodide is an intermediate in synthesizing BTS 44596 (B689355), which is a metabolite of Prochloraz (P755280), an effective fungicide against cereal powdery mildew. Molecular Formula: C <sub>16</sub> H <sub>19</sub> Cl <sub>3</sub> N <sub>3</sub> O <sub>2</sub> I Solubility: Dichloromethane,... |
| Molecular Weight           | 391.701269                                                                                                                                                                                                                                                                                                                     |
| Form                       | Supplied as a Off White Solid                                                                                                                                                                                                                                                                                                  |
