| Category                   | Biochemikalien                                                                                                                                                                                                                                                                       |
| Product Description        | An impurity of Heroin. Molecular Formula: C <sub>18</sub> H <sub>16</sub> O <sub>4</sub> Solubility: Chloroform, Methanol Molecular Weight: 296.32 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge the original vial prior to removing the cap.... |
| Molecular Weight           | 296.32                                                                                                                                                                                                                                                                               |
| Form                       | Supplied as a Pale Yellow Solid                                                                                                                                                                                                                                                      |
