| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | The ALCAM/CD166 protein is a cell adhesion molecule that mediates heterotypic and homotypic cell-to-cell contacts, promoting T cell activation, immune synapse formation, and LILRB4-mediated inhibition of T cell proliferation. ALCAM/CD166 Protein, Hum... |
| Molecular Weight           | 70-80 kDa                                                                                                                                                                                                                                                     |
| Purity                     | 95                                                                                                                                                                                                                                                            |
| Formula                    | 214(Gene_ID)Q13740 (W28-A526)(Accession)                                                                                                                                                                                                                      |
| Application Notes          | Recombinant Proteins                                                                                                                                                                                                                                          |
