| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | B2M or Beta-2 microglobulin binds to MHC class II protein complexes and forms homodimers. It responds to cadmium ions and exogenous stimuli and is present in the extracellular space. B2M/Beta-2 microglobulin Protein, Rat (99a.a, HEK293, His) is the r... |
| Molecular Weight           | approximately 13 kDa                                                                                                                                                                                                                                          |
| Purity                     | 95                                                                                                                                                                                                                                                            |
| Formula                    | 24223(Gene_ID)NP_036644 (I21-M119)(Accession)                                                                                                                                                                                                                 |
| Application Notes          | Recombinant Proteins                                                                                                                                                                                                                                          |
