| Manufacturer               | MedchemExpress                                                                                                                                                                                                                                                |
| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | The GM-CSF protein functions as a key cytokine that promotes the growth and differentiation of hematopoietic precursor cells of different lineages, such as granulocytes, macrophages, eosinophils, and erythrocytes. In its monomeric form, GM-CSF acts a... |
| Molecular Weight           | Approximately 19-29 kDa due to the glycosylation                                                                                                                                                                                                              |
| Purity                     | 98                                                                                                                                                                                                                                                            |
| Formula                    | 1437(Gene_ID)P04141 (A18-E144)(Accession)                                                                                                                                                                                                                     |
| Application Notes          | Recombinant Proteins                                                                                                                                                                                                                                          |
