| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | The EIF3G protein is an RNA-binding component of the eIF-3 complex that initiates protein synthesis by promoting the recruitment of factors to form the 43S PIC. EIF3G is critical in both mRNA recruitment and AUG recognition scanning. EIF3G Protein, H... |
| Molecular Weight           | 51.5 kDa                                                                                                                                                                                                                                                      |
| Formula                    | 8666(Gene_ID)O75821 (P2-N320)(Accession)                                                                                                                                                                                                                      |
| Application Notes          | Recombinant Proteins                                                                                                                                                                                                                                          |
