| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | The uPAR protein acts as a receptor for urokinase plasminogen activator, facilitating plasmin formation and signal transduction activation. It interacts with SRPX2 and forms a monomer. uPAR also interacts with MRC2 and SORL1, reducing PLAUR internali... |
| Molecular Weight           | 50-65 kDa                                                                                                                                                                                                                                                     |
| Formula                    | /(Gene_ID)P35456-1 (L24-G298)(Accession)                                                                                                                                                                                                                      |
| Application Notes          | Recombinant Proteins                                                                                                                                                                                                                                          |
