| Product Description        | TNFRSF1A (TNF RI) protein has a high ability to bind with tumor necrosis factor-alpha (TNF-alpha). TNFRSF1A is a STAT3 target gene that regulates the NF-kappaB pathway. TNFRSF1A activate NF-kappaB, mediate apoptosis, and function as a regulator of in... |
| Molecular Weight           | Approximately 35 kDa                                                                                                                                                                                                                                          |
| Formula                    | 21937(Gene_ID)P25118 (M1-A212)(Accession)                                                                                                                                                                                                                     |
| Application Notes          | Recombinant Proteins                                                                                                                                                                                                                                          |
