| Molecular Weight           | 28 kDa                                                                                                                                                                                                                      |
| Tag                        | C-His                                                                                                                                                                                                                       |
| NCBI                       | 002724611                                                                                                                                                                                                                   |
| Expression System          | HEK293 Cells                                                                                                                                                                                                                |
| Purity                     | > 95 % as determined by reducing SDS-PAGE.                                                                                                                                                                                  |
| Form                       | Lyophilized from sterile PBS, pH 7.4Normally 5 % - 8 % trehalose,<br>mannitol and 0.01% Tween80 are added as protectants before<br>lyophilization.Please refer to the specific buffer information in the<br>printed manual. |
| Sequence                   | Met1-Arg160                                                                                                                                                                                                                 |
| Target                     | CLM-9,TREM4                                                                                                                                                                                                                 |
