| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Conjugation                | Unconjugated                                                                                                                                                                                                                                                  |
| Product Description        | Vascular endothelial growth factor C is also known as VEGFC, Flt4L and VRP, it contains the Cterminal propeptide which has an unusual structure with tandemly repeated cysteinerich motifs. Upon biosynthesis, VEGFC is secreted as a noncovalent momodime... |
| Molecular Weight           | 14.9 kDa                                                                                                                                                                                                                                                      |
| Tag                        | C-6*His                                                                                                                                                                                                                                                       |
