| UniProt                    | <a href="#">P28906</a>                                                                                                                                                                                                                                         |
| Buffer                     | CD34 Peptide is supplied as 100 µg of dried peptide. When the peptide is reconstituted in 200 µL water, the concentration will be 0.5 mg/mL.                                                                                                                   |
| Form                       | Lyophilized                                                                                                                                                                                                                                                    |
| Application Notes          | CD34 Antibody ships at 0.5 mg/mL and the CD34 Peptide ships as a 100 µg pellet. When peptide is reconstituted in 200 µL water, the concentration will be 0.5 mg/mL, identical to that of the antibody. The best starting ratio would be 1:1 (which means molar |
