| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | Monocyte chemoattractant protein 1 (MCP-1), also called CCL2, is a member of the beta (C-C) subfamily of chemokines that is a chemoattractant for monocytes and basophils but not eosinophils or neutrophils. CCL2 binds the cognate receptor CCR2, and to... |
| Molecular Weight           | 27-37 kDa (reducing condition)                                                                                                                                                                                                                                |
| CAS Number                 | [TMPJ-00852]                                                                                                                                                                                                                                                  |
| Target                     | C-C motif chemokine 2 , Small-inducible cytokine A2 , Monocyte chemoattractant protein 1 , Monocyte chemotactic protein 1 , Scya2 , MCP-1 , Ccl2                                                                                                              |
