| Product Description        | Colipase (CLPS) is a cofactor of pancreatic lipase and is necessary for efficient dietary lipid hydrolysis. It allows the lipase to anchor itself to the surface of lipid micelles, thereby counteracting the inhibitory effect of intestinal bile salts o... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
| Concentration              | 1ug/ul                                                                                                                                                                                                                                                        |
| NCBI                       | <a href="#">109791</a>                                                                                                                                                                                                                                        |
| Buffer                     | Aqueous buffered solution containing 0.01M TBS (pH7.4) with 1% BSA, 0.03% Proclin300 and 50% Glycerol.                                                                                                                                                        |

|                    |                                                             |
