| Host                       | Mouse                                                                                                                                                                                                                                                      |
| Category                   | Antikörper                                                                                                                                                                                                                                                 |
| Application                | IHC-P, WB                                                                                                                                                                                                                                                  |
| Species Reactivity         | Human                                                                                                                                                                                                                                                      |
| Immunogen                  | A portion of amino acids 50-250 was used as the immunogen for the GLUL antibody.                                                                                                                                                                           |
| Product Description        | Glutamine synthetase (GISyn) forms a homo-octamer that serves as a catalyst for the amination of glutamic acid to form glutamine. This enzyme is a marker for astrocytes, which serve as the primary site of conversion of glutamic acid to glutamine in t |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                 |
| Clone Designation          | [GLUL/6599]                                                                                                                                                                                                                                                |
| UniProt                    | P15104                                                                                                                                                                                                                                                     |
| Purity                     | Protein A/G affinity                                                                                                                                                                                                                                       |

| Form               | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide       |
|--------------------|-------------------------------------------------------------------------------|
| Antibody Type      | Primary Antibody                                                              |
| Application Dilute | Western blot: 1-2ug/ml,Immunohistochemistry (FFPE): 1-2ug/ml                  |
| Application Notes  | Optimal dilution of the GLUL antibody should be determined by the researcher. |
