| Product Description          | Human Growth Differentiation Factor 1 (GDF1) ELISA Kit for detecting GDF1 in serum, plasma, tissue homogenates, cell lysates, cell culture supernates, other biological fluids. Species Reactivity: Human (Homo sapiens). Detection Range: 15.6-1,000pg/ml |
| Range 1                      | 15.6-1,000pg/ml                                                                                                                                                                                                                                            |
| Sensitivity 6                | 6.2pg/ml                                                                                                                                                                                                                                                   |
| NCBI 2                       | 2657                                                                                                                                                                                                                                                       |
